JOHN WALTER BITOON

IT DESKTOP ENGINEER

PROFILE

IT Desktop Engineer with experience in hardware support, workstation deployment, system troubleshooting, and Active Directory. Skilled in providing technical support in fast-paced environments, with knowledge of Jira, VPN setup, YubiKey configuration, Splunk Cloud, and Windows administration.

WORK EXPERIENCE

INTOUCHCX- *I.T Desktop Engineer*

Present

- Configured and deployed multiple workstations across the multiple programs
- Conducted system audits to validate and ensure proper implementation of technologies.
- Performed large-scale configuration of multiple machines
- Provided client/customer support through the Ticketing System (Jira)
- Provided technical support for installation, troubleshooting, maintenance, and upgrades of hardware and peripherals.

KING PROPERTIES - *I.T Assistance (Intern)*

2023 - 2024

- Installed and configured new firewalls and endpoints based on company requirements.
- Created and updated RFID access for new and existing employees.
- Resolved IT-related issues within the company.

WORK ACHIEVEMENTS

INTOUCHCX- *I.T Desktop Engineer*

- Deployed and configured more than 500+ workstations across multiple production programs.
- Developed an automated tracking system by converting manual spreadsheet processes into a web-based form system.
- Addressed client concerns and implemented requested solutions, including system hardening, software deployment, and policy integration.
- Developed a bulk badge ID configuration system using Arduino and Python scripts to improve and automate the existing Genetec badge setup process.

JOHN WALTER BITOON

IT DESKTOP ENGINEER

WORK ACHIEVEMENTS

KING PROPERTIES - I.T Assistance (Intern)

- Assisted in implementing firewall and endpoint protection solutions to strengthen company infrastructure security and improve system protection against threats.
- Participated in multiple technology summits and vendor demonstrations to evaluate and explore new solutions for improving IT infrastructure and operational efficiency.
- Installed, configured, and managed multiple CCTV systems across the company to support security monitoring and surveillance operations.
